Agenda

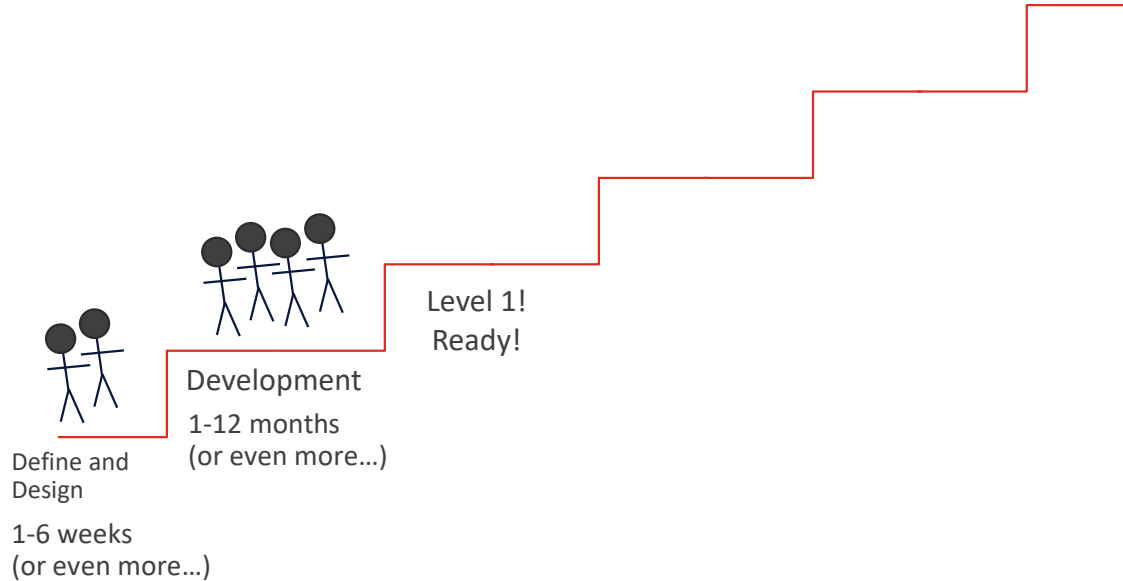

- The way things used to work (or still do..)
- DevOps Agile Skills Association (DASA)
 - Team work!
 - Evolution of agile and automation
 - New set of rules and guidelines (to stay in business)
- How to get there

Old ways of working

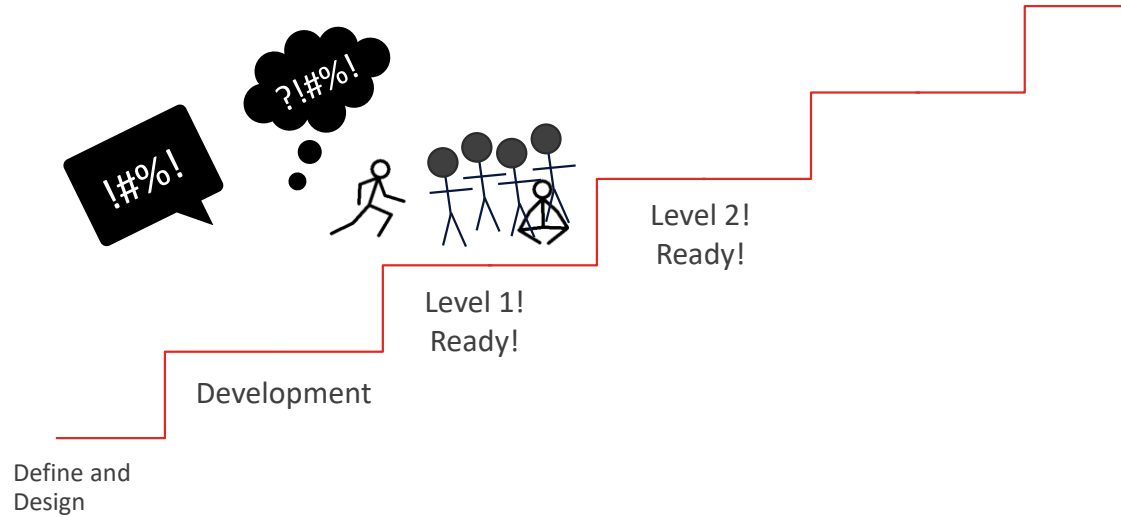

Deployment frequency = 2 times a year

Reactive

Reactive

Unappreciated

DASA

DEVOPS AGILE
SKILLS ASSOCIATION

About DASA

The DevOps Agile Skills Association

About the DevOps Agile Skills Association (DASA)

DASA is an **independent** and **open** association supporting the development of **DevOps training** and **certification** to the global market.

Advocating the development of **high-performance IT professionals and organizations** through agile DevOps initiatives.

DASA offers **thought leadership** as well as **practical guidance** for competence development for professionals and organizations.

DASA Six DevOps Principles

Principle 1 Customer-centric action

Courage to act
Innovate
< Bureaucracy

Principle 2 Create with end in mind

Product & Service thinking
Engineering mindset
Collaborate

Principle 3 End-to-End Responsibility

Live your accountability
Concept to grave
Performance support

Principle 4 Cross-functional autonomous teams

T-shaped profiles
Complementary skills
Team work

Principle 5 Continuous Improvement

If it hurts do it more often
Experimentations
Fail Fast – Fail Safe – Learn Fast – Improve Fast

Principle 6 Automate everything you can

Enhance quality
Standardize
Maximize flow

DASA Competence Model and Qualification Program

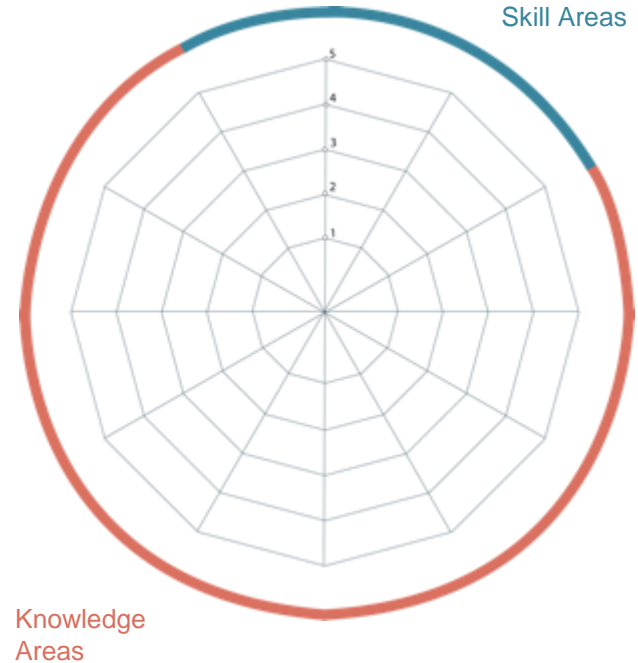

DASA Competence Framework

Knowledge Areas

Business Value Optimization
Business Analysis
Architecture & Design
Programming
Continuous Delivery
Test Specification
Infrastructure Engineering
Security, Risk & Compliance

Skills Areas

Courage
Teambuilding
DevOps Leadership
Continuous improvement

1- Novice / 2- Competent / 3- Proficient / 4 - Expert / 5 - Master

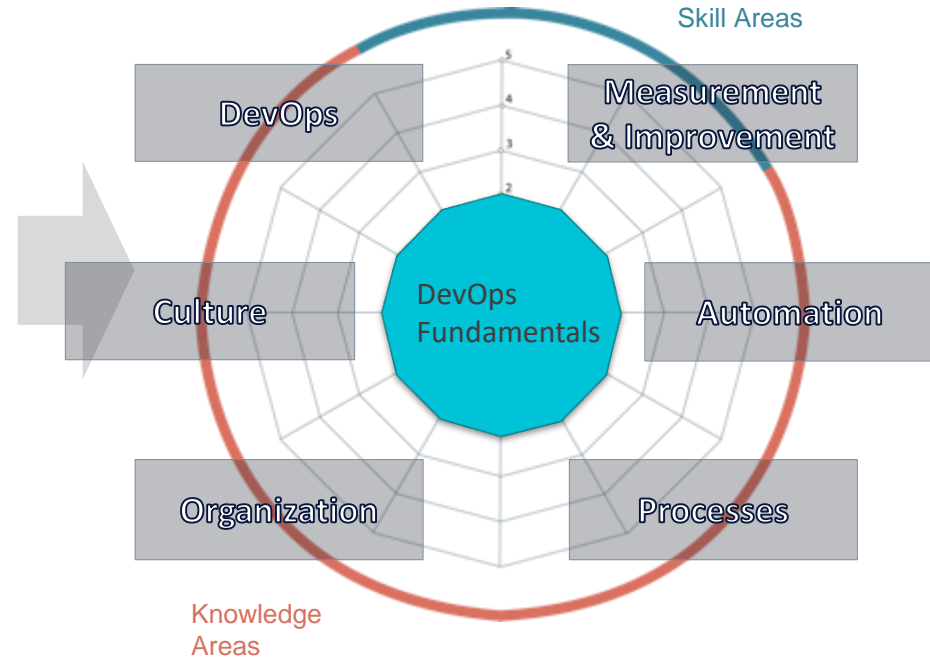

DASA Competence Framework with Qualification

Knowledge Areas

Business Value Optimization
Business Analysis
Architecture & Design
Programming
Continuous Delivery
Test Specification
Infrastructure Engineering
Security, Risk & Compliance

Skills Areas

Courage
Teambuilding
DevOps Leadership
Continuous improvement

Skills Areas

Courage
Teambuilding
DevOps Leadership
Continuous improvement

Hey!

I found this thing called Continuous Delivery!

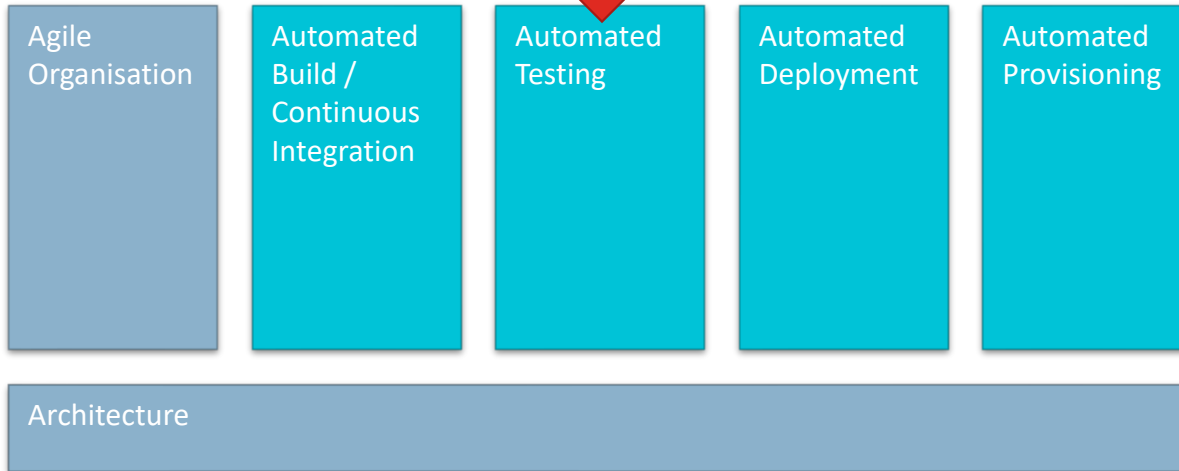

Continuous Delivery

Test-Driven Development (TDD) (unit tests)
Behaviour Driven Development (BDD) (functional tests)
Acceptance Test Driven Development (ATDD) (acceptance tests)

Integration, platform, UI, load, security, ...

ENDLESS TOOLS, TECHNOLOGIES AND OPPORTUNITIES!

New ways of working

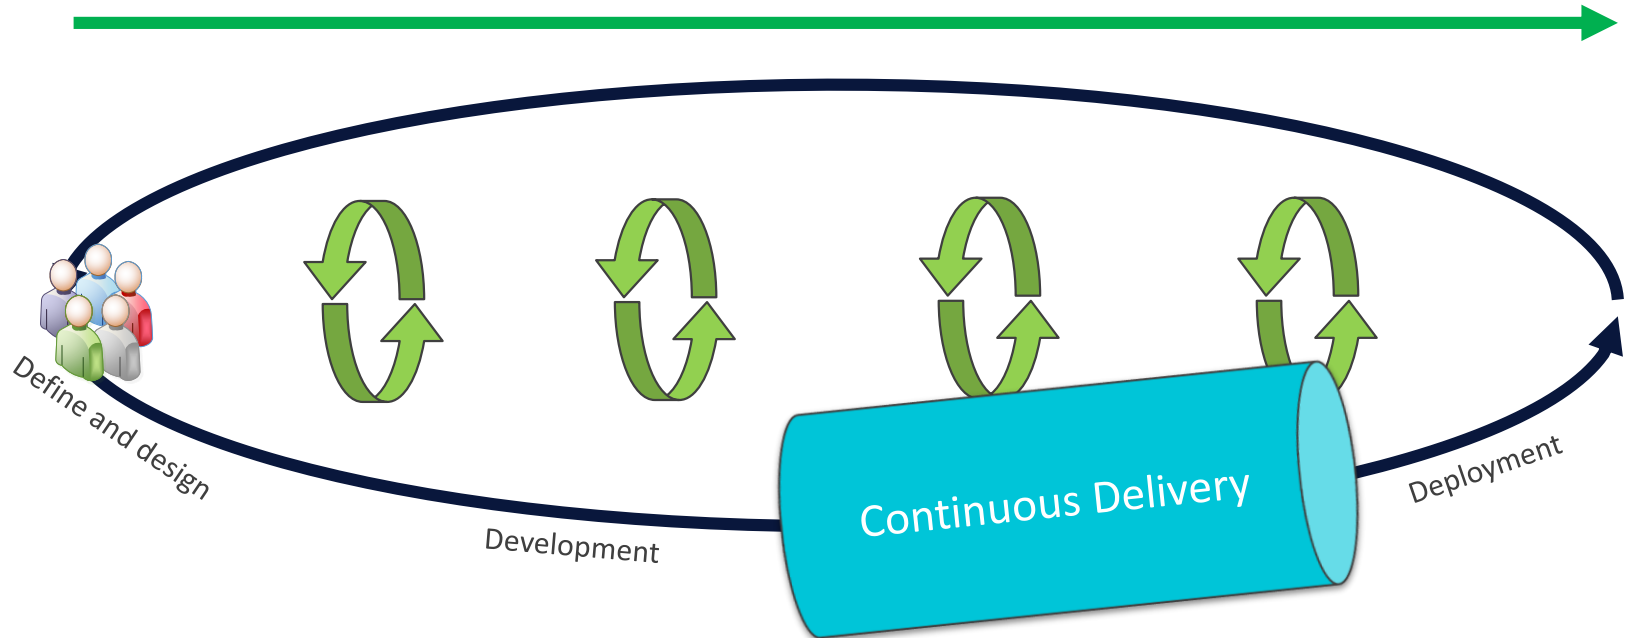

Deployment frequency = 2+ times a day

0 Defects

Manual testing = exploratory testing = improve tests

Good visibility through out the services lifecycle

Risks are handled constantly (RAT, MVP, MLP, proto, ...)

How to get here?

1. “Culture eats strategy for breakfast”

Peter Drucker.

2. Teamwork

- Know and trust yourself
- Be humble
- Trust each other
- Self discipline

3. Get rid of the siloes!

4. Improve your skills

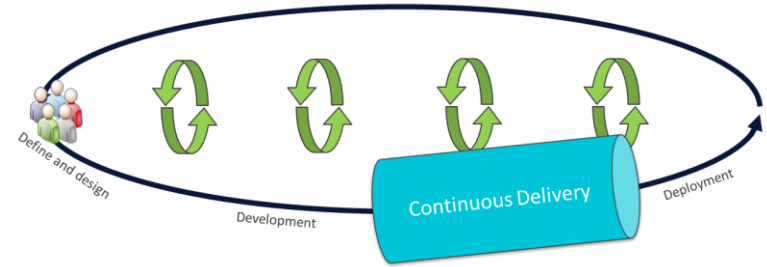

- Be active

5. Continuous learning and experimentation

6. Continuous improvement

7. ...

Deployment frequency = 2 times a day
0 Defects
Manual testing = exploratory testing = improve tests
Good visibility through out the services lifecycle
Risks are handled constantly (RAT, MVP, MLP, proto, ...)

Appreciated

Thank you!
